DELIVERY GUIDE

KLO Engagement Platform

New Life Leadership Conference — Montgomery, AL

Saturday, March 7, 2026 | Prepared by Maven (Tim Adams)

1 Platform URLs

The platform is live and ready. Here are the key URLs:

MAIN PLATFORM

- https://klo-app.vercel.app

Full platform: assessments, AI advisor, vault, booking, events, and more.

CONFERENCE ENGAGEMENT PAGE

- https://klo-app.vercel.app/conference

Where attendees go to ask questions, vote in polls, and submit word cloud words. This is the audience-facing page.

CONFERENCE MONITOR (ADMIN)

- `https://klo-app.vercel.app/conference/monitor`

Real-time dashboard for the presenter. Shows incoming questions, poll results, and word cloud. **Must be logged in as Owner or Admin.**

QR CODE / ENGAGEMENT MAGNET

- `https://klo-app.vercel.app/conference/join`

Full-screen page designed to be projected. Shows a QR code that attendees scan to join the conference. Looks great on any screen size.

2 Login Credentials

🔒 **Staff only** — do not share these credentials with attendees. Attendees do NOT need to log in to participate in the conference.

ROLE	EMAIL	PASSWORD	USE FOR
Owner	`keith@keithlodom.io`	`Password123!`	Full access — conference monitor, admin panel, all features
Admin	`admin@keithlodom.io`	`Password123!`	Conference monitor, event management, content moderation
Moderator	`moderator@keithlodom.io`	`Password123!`	Question moderation, marking questions as

ROLE	EMAIL	PASSWORD	USE FOR
			answered

💡 Attendees participate without logging in. They just scan the QR code and go to `/conference` .

3 Day-Of Setup (30 min before)

1. **Connect to venue WiFi** on your laptop/tablet. Confirm `klo-app.vercel.app` loads.
2. **Log in as Owner** at `/auth/signin` using Keith's credentials above.
3. **Open the Conference Monitor** at `/conference/monitor` on your device (laptop or tablet). This is your real-time dashboard — keep it open throughout the session.
4. **Activate Seminar Mode.** On the monitor page, toggle "Seminar Mode" ON. This unlocks the interactive tools (polls, Q&A, word cloud) for attendees. *Tools stay locked until you activate this.*
5. **Set up the projector.** On the projected screen, open `/conference/join` in full-screen (press `F11` or `Cmd+Shift+F` in Chrome). This shows the QR code for attendees to scan.
6. **Test with your phone.** Scan the QR code, submit a test question, and verify it appears on the monitor. Delete the test question from the monitor afterward.
7. **Create your polls** from the monitor page. You can create polls before the session starts and activate them at the right moment.

4 During the Session

Opening (first 2 minutes)

- Show the QR code slide (`/conference/join`) on the projector
- Say: *"Scan this QR code to ask questions, vote in polls, and participate live. No login required — just point your camera."*
- Give attendees ~60 seconds to connect

Q&A

- Attendees submit questions from their phones at `/conference`
- Questions appear on your monitor in real-time with upvote counts
- You can mark questions as "Answered" from the monitor
- Questions with the most upvotes rise to the top

Live Polls

- Create polls from the monitor page (you can pre-create them)
- Activate a poll when you're ready — attendees see it instantly
- Results update in real-time on both the monitor and audience view
- Each person gets one vote per poll (works correctly on shared WiFi)

Word Cloud

- Ask a question like *"In one word, what does innovation mean to you?"*
- Attendees type their word on the conference page
- The word cloud builds in real-time — popular words appear larger

> ✅ **Optimized for 100+ users** — shared WiFi voting, debounced real-time updates, server-side caching, and SQL-side aggregation ensure smooth performance even with a full room.

5 Platform Features to Highlight

Beyond the conference tools, here's what attendees can explore on the platform:

ASSESSMENTS

Four interactive assessments attendees can take from their phones:

- **AI Readiness Assessment** — gauge your organization's AI preparedness
- **Church Technology Readiness** — evaluate digital ministry capabilities
- **Cyber Risk Assessment** — identify security vulnerabilities
- **Governance Assessment** — review organizational governance health

THE VAULT

Curated executive briefings and resources. Featured content:

- **"Navigating the Moral Frontier of Generative AI in Ministry"** — brand new briefing available now

AI STRATEGY ADVISOR

AI-powered chat for technology strategy questions. Includes a Policy Builder tool for generating governance frameworks.

BOOKING & CONSULTATION

Attendees can book a 1-on-1 consultation with Keith directly from the platform.

6 Projector-Ready Slides (PPTX)

Two presentation decks are included and ready to present:

PLATFORM GUIDE

`platform-guide.pptx` — Full overview of the KLO Engagement Platform. Covers all features, assessments, vault, AI advisor, and booking.

CONFERENCE V2.2 GUIDE

`conference-v2-guide.pptx` — Focused on conference tools: live polls, Q&A, word cloud, and what's new (shared WiFi voting, 100+ user optimization).

CREDENTIALS SLIDE

`credentials-slide.pptx` — Staff-only slide with login credentials. **Do NOT project this to the audience.**

💡 All PPTX files are in the `public/` folder. They can also be downloaded from: `klo-app.vercel.app/platform-guide.pptx` and `klo-app.vercel.app/conference-v2-guide.pptx`

7 Troubleshooting

Attendees can't scan the QR code

- Tell them to type `klo-app.vercel.app/conference` in their browser
- Works on any phone — iPhone, Android, any browser

Polls/Q&A not showing for attendees

- Make sure **Seminar Mode is ON** in the monitor page
- If still not working, have attendees refresh their browser

Attendee says they already voted

- Each browser session gets one vote per poll — this is by design
- If they clear their browser or use incognito, they could vote again (acceptable edge case)

Page is slow or not updating

- The app has CDN caching (2-5 seconds). Real-time updates use WebSockets — they should appear within 1 second
- If an attendee's page seems stuck, a browser refresh fixes it

Need to remove an inappropriate question

- From the monitor, click the question and delete/hide it
- It disappears for all attendees immediately

8 Pre-Event Checklist

- ☐ Venue WiFi tested and working on your devices
- ☐ Logged in to platform as Owner (keith@keithlodom.io)
- ☐ Conference Monitor open on laptop/tablet
- ☐ Seminar Mode activated
- ☐ QR code page projected and visible
- ☐ Test question submitted and verified on monitor
- ☐ Test data cleaned (no leftover test questions/polls)
- ☐ Polls pre-created for the session
- ☐ PPTX presentations loaded and ready
- ☐ Phone charged (for backup monitoring)

- [ ] Backup URL ready to share verbally (klo-app.vercel.app/conference)
